

CONTINUITY TESTER WITH QUICK-CHANGE INTERFACE

The TestMateSM continuity tester features a universal interface fixture that accommodates adapter cards for quick changes in harness setups. Adapters can be exchanged in seconds to adapt quickly to any of a variety of wire-harness/cable connectors.

Wire list programs are created and assigned signature codes by learning from known-good assemblies. TestMateSM memory accommodates 56 test programs without user labels, or 14 programs with user labels. Through control panel keys, programs may be transferred to and from memory, or deleted if no longer needed.

Testing automatically starts when the assembly under test is engaged with the adapter cards. If no fault is detected, a "Pass" is displayed, accompanied by a tone. At a fault, TestMateSM will stop and display the connector and pin numbers and type of error - "O" or "S" (Open or Short). Repeated pressing of Test will continue the test.

When used as an assembly aid, TestMateSM will identify each wire touched, using body conductance. Identification by touch also provides an easy method of troubleshooting faulty cables, and testing cables with loose (unterminated) ends.

Hardcopies of test results and wire lists are available when an optional printer is connected. With your PC connected, wire lists can be programmed offline – and assigned six-character user labels. Also with the PC, wire lists may be moved to and from TestMateSM.

A Self Test function instantly verifies correct operation of TestMateSM.

CONTINUITY TESTER

Cablescan's TestMateSM uses Adapter Cards to interface directly with your harness connectors.

FEATURES

- Universal interface
- Adapter cards for connector types
- Programmed by self-learn
- Multiple program storage
- Connector pin ID by touch
- Parallel printer and PC interfaces

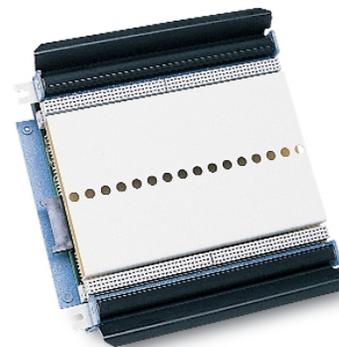

TESTMATESM FEATURES / SPECIFICATIONS

FEATURES

- Self programming by “learning” a “known good” or sample harness from a batch
- Automatic test, and display of error data
- Built-in interface fixture for quick and inexpensive connections of test cable
- Program save and load
- Identification or location of wires through touch, using wrist strap or probe
- Self test of TestMateSM
- Alphanumeric test point labels (user labels)
- Memory for 56 wire list programs (without user labels) or 14 programs (with user labels)
- Printer and PC interface ports

Optional features are:

- Printout of wire list programs
- Printout of errors encountered during test
- Programming and control by PC using Cablescan TestRiteSM software

EXPANSION MODULE

Adds 128 test points to TestMateSM.

SPECIFICATIONS

TEST POINT CAPACITY

128 test points, expandable to 256 test points

OPERATING SPEED

Test: < 0.5 sec.; Self Test: < 2 sec.;
Learn: < 0.5 sec.

TEST PARAMETERS

Short Threshold: < 100 Ohms
Open Threshold: > 1000 Ohms
Continuity Threshold: < 100 Ohms
Test Current: < 3 ma
Body Current: < 5 μ a

TEST VOLTAGE

10 vdc, max.

INTERWIRE CAPACITANCE

.01 μ f, max.

DISPLAY

16-character Alphanumeric LCD

PROGRAM STORAGE

Battery-backed CMOS RAM accommodating
56 programs without User Labels, or
14 programs with User Labels

BATTERY LIFE

5 years

POWER REQUIREMENTS

104 to 126 V~, 50/60 Hz or
208 to 252 V~, 50/60 Hz (Power Pack change)

TEMPERATURE

Operating: 32° to 105 °F (0° to 40 °C)

Storage: -40° to 165 °F (-40° to 74 °C)

DIMENSIONS

11.5 x 6.75 x 2.5 in. (29.2 x 17.1 x 6.3 cm)

18.0 x 6.75 x 2.5 in. (45.7 x 17.1 x 6.3 cm)
with expansion unit

WEIGHT

5.0 lbs. (2.3 kg) or

7.0 lbs. (3.2 kg) with expansion unit

INTERFACE PORTS

Printer: Parallel

PC: Serial

ORDERING INFORMATION

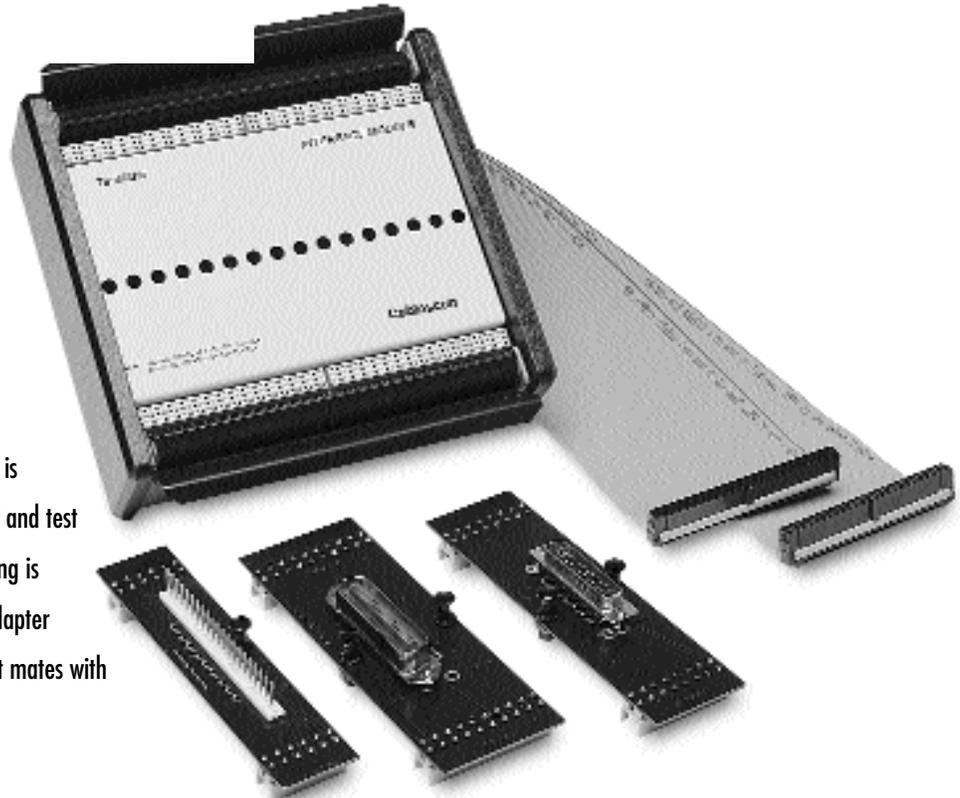

Part Number	Description
5211089	TestMate SM (128 points)
5211090	TestMate SM Expansion Unit
5211091	TestMate SM (256 points)
5211082	TestRite SM Software
5210996	Parallel Printer

INTERFACE MODULE AND ADAPTER CARDS

The Cablescon TestMateSM Interface Module is the low-cost solution to your wire harness build and test fixturing applications. Expensive custom fixturing is eliminated by use of simple interchangeable Adapter Cards and a continuous connector interface that mates with any Cablescon tester.

TestMateSM Interface Module

The Interface Module connects to your Cablescon test system through 64-conductor flat cables to provide an interface of 128 test points. It provides a permanent interface with your tester, and a changeable interface with Adapter Cards. The Interface Module provides durable and reliable connections and quick test setups. A continuous connector surface allows end stacking of various-size Adapter Cards along its length. Additional Interface Modules may be used for accommodating larger testers and more harness connectors.

The number of pins in each mating connector determines the width of its Adapter Card, thereby maximizing the use of space along the length of the interface connector. This allows more harness connectors to be interfaced using fewer tester points.

TestMateSM Adapter Cards

Cablescon currently offers Adapter Cards to mate to most common cable/harness connectors. Blank universal cards are available for mounting other connector types. Reconfiguration for different harnesses is achieved simply by changing Adapter Cards.

FEATURES

- Quick hookup and disconnect
- Ready changeover between harness part numbers
- Makes low-volume runs cost-effective
- Interfaces to most harness configurations
- Library of Adapter Cards available
- Saves wear-and-tear on tester interface

ADAPTER CARDS

Note: Male/Female designation refers to adapter card connector.

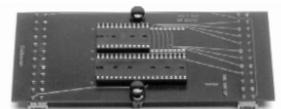

Single Row Headers	
Part Number	Size
5220821	21-pin (.156, .100, .050) w/o connector
5220821-2	21-pin, with .156 header
5220821-3	21-pin, with .100 header

Single Row Metric Header	
Part Number	Size
5220921	21-pin (1mm, 2mm, 2.5mm) w/o connector

Ribbon Connector, .085" Centers	
Part Number	Size
5220614-1	14-pin female
5220614-2	14-pin male
5220624-1	24-pin female
5220624-2	24-pin male
5220636-1	36-pin female
5220636-2	36-pin male
5220650-1	50-pin female
5220650-2	50-pin male
5220664-1	64-pin female
5220664-2	64-pin male

DIP Connectors	
Part Number	Size
5221216-1	14 & 16-pin
5221240-1	24 & 40-pin

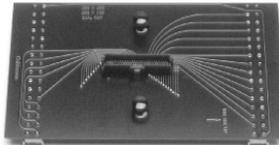

Eurocard Connectors	
Part Number	Size
5220496-2	96-pin male
5220464-2	64-pin male (a & c)

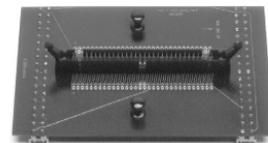

Modular Phone Jacks	
Part Number	Size
5220716	4, 6, & 8-pin

Dual Row Metric Header (1MM, 2MM, 2.5MM)	
Part Number	Size
5221320	20-pin (w/o connector)
5221344	44-pin (w/o connector)

Dual Row Header .50 X .100	
Part Number	Size
5222010-2	10-pin male
5222020-2	20-pin male
5222030-2	30-pin male
