evp The Smart Solution to MRO Management

Managing MRO materials is complex and costly

Poorly managing MRO materials exposes your business to risk.
Consider just a few of the associated Issues and costs.

- How often are you setting up new suppliers, and how much time does that typically take?
- How much time do you spend processing PO's, shipments, invoices and payments?
- How much down time has your company experienced due to shortages or outages of MRO product?
- What processes do your company have in place to control inventory flow?
- How much does poorly managing your MRO cost you annually?

This is Controlled Chaos at Best!

The EVP program has been a welcome addition for Key Electronics. The people at Murray Percival have been great to work with, and the program is going very well. After implementing it in Nov. 2011, we didn't realize how much time we were spending issuing PO after PO for supplies. It's amazing to see the difference. Thanks.
Lori, Buyer, Key Electronics, Inc.

50 YEARS OF SERVICE

Welcome to MP's EVP Program – “We know how...”

EVP: Enhanced Vendor Partnership

The MP Company has identified a group of select customers who we believe are prime candidates for this special partnership. A comprehensive range of services is available which can eliminate MRO issues and positively affect your bottom line.

The following are a few of the EVP features and benefits available to improve your profitability and help manage MRO materials:

- Resolve issues with material and/or process
- Learn about innovative processes and new materials via “We know how...”
- Provide access to thousands of products
- Reduce and manage your vendor base
- Minimize the number of PO's and invoices
- Procure the material and manage inventory
- Leverage our buying power
- Willingness to consider consignment
- Track and trace automation
- Actively monitor material levels
- Consolidate shipments to save freight, and hazardous material costs
- Monitor expired, and slow moving materials
- Reduce waste and manage scrap material
